BI 194/194L: UNDERWATER ECOLOGICAL SURVEYING TECHNIQUES

This Special Projects course and lab is an introduction to nearshore underwater ecological surveying techniques with field experience conducted on snorkel. You will identify common fish and invertebrate species, gather data using survey techniques practiced on land and in water, and apply skills through the development and writing of a scientific report.

SPECIAL NOTES
This course is open to any UOG student and counts toward General Education science credits. You must also register for the lab section (BI 194L). Do not enroll in this course if you cannot swim; you will be required to do a swim test.
