K-12 teachers appreciate guest speakers and topic specialists to supplement their daily lessons. But being an effective guest in Guam's public schools requires planning, practice, and a sense of adventure! Learn from a group of teachers about how to best serve Guam's classrooms and enhance your outreach skills toolkit.

This short workshop is recommended for graduate students and beginning professionals interested in collaborating with the Guam Department of Education. Ask our expert panel, representing schools from all around the island, about how to become an exemplary educator!
